

Influence of ectomycorrhiza *Paxillus involutus* (Batsch. Ex. Fr.) inoculation and fungicide treatment on *Populus* sp.

Dissertation

**In Partial Fulfilment of the Requirements for the Degree of Doctor Forest
(Dr. Forest)**

of the Faculty of Forest Science and Forest Ecology

Georg-August- University of Göttingen, Germany

Submitted by

Manika Mishra-Knyrim

Born at Bhadreswar, W.B, India

Göttingen, 2009

Bibliografische Information der Deutschen Bibliothek

Die Deutsche Bibliothek verzeichnet diese Publikation in der Deutschen Nationalbibliografie; detaillierte bibliografische Daten sind im Internet über <http://dnb.ddb.de> abrufbar.

Supervisor and

1st Examiner: Prof. Dr. Andrea Polle

2nd Examiner: Prof. Dr. Reiner Finkeldey

3rd Examiner: Prof. Dr. Stefan Schütz

Date of Examination: 16.01.09

Table of contents

Summary	1
Zusammenfassung	6
Chapter-1	9
1.1 Introduction	9
1.1.1 <i>Populus</i> sp.	9
1.1.2 Mycorrhiza	10
1.1.3 Fungicide	14
1.1.4 Endophytic fungi	16
1.1.5 Insect <i>Helicoverpa armigera</i>	17
1.1.6 Biochemical traits affecting biotic interactions	18
1.1.7 Volatile compounds (VOC)	19
1.1.8 Objectives	19
1.1.9 References	21
Chapter 2	35
2.1 Introduction	35
2.2 Materials and Methods	37
2.2.1 Production of axenic clonal plantlets	37
2.2.2 Production of fungal isolates <i>Paxillus involutus</i> (strains MAJ and NAU)	37
2.2.3 Growth chamber	37
2.2.4 In-vitro inoculations	38
2.2.5 Morphological studies	39
2.2.6 Anatomical investigations	39
2.3 Statistical analysis	40
2.4 Results	40
2.4.1 Root morphology and anatomy	40
2.4.2 Mycorrhizal colonisation and plant performance	44
2.5 Discussion and conclusions	47
2.6 Acknowledgement	49
2.7 References	50

Chapter 3.....53

3.1 Introduction	53
3.2 Material and Methods.....	56
3.2.1 Experimental lay-out	56
3.2.2 Maj inoculation and fungicide Previcur® N treatment	59
3.2.3 Experimental analysis	59
3.2.3.1 Microsatellites	59
3.2.3.2 Carbon (C) and nitrogen (N) analysis	60
3.2.3.3 Mineral element analysis.....	61
3.2.3.4 Photosynthesis.....	61
3.2.3.5 Growth parameters	63
3.2.3.6 Parameters determined at harvest.....	63
3.3 Statistical analysis	64
3.4 Results	64
3.4.1 Microsatellites	64
3.4.2 Plant survivability	66
3.4.3 Clone morphology	66
3.4.4 Growth of <i>P. nigra</i> clones	71
3.4.5 Parameters determined at harvest.....	74
3.4.5.1 Shoot:root and root:shoot ratios	74
3.4.5.2 Individual clone growth with treatment	74
3.4.5.3 Morphological growth of clones	76
3.4.6 Nutrients	80
3.4.6.1 C and N analysis.....	80
3.4.6.2 Elements analysis	83
3.4.7 Photosynthesis.....	86
3.5 Discussion	89
3.5.1 Were the cuttings of <i>P. nigra</i> genetically different or did they belong to one clone?	89
3.5.2 Did the <i>P. nigra</i> clones perform morphologically and physiologically different?	90
3.5.3 Did the mycorrhizal inoculation influence the growth and development of <i>P. nigra</i> clones?	91
3.5.4 How did the <i>P. nigra</i> clones respond to the fungicide in absence of mycorrhizal inoculation?	92

3.5.5 How did the inoculation in addition to fungicide act on <i>P. nigra</i> clones?	93
3.5.6 Did the mycorrhizal inoculum and fungicide treatment influence the nutrient status of <i>P. nigra</i> clones?	94
3.6 Conclusions	95
3.7 Acknowledgement	96
3.8 References	97

Chapter 4.....107

4.1 Introduction	107
4.2 Materials and Methods	111
4.2.1 Symbiotic fungi	111
4.2.1.1 Ectomycorrhizal (EM) fungi	111
4.2.1.2 Arbuscular mycorrhizal (AM) fungi	112
4.2.1.3 Endophytic fungi	112
4.2.2 Foliar feeding test by larvae <i>Helicoverpa armigera</i>	113
4.2.3 Biochemical contents	114
4.2.3.1 Internal Transcribed Spacer (ITS) sequences for EM	114
4.2.3.2 Propamocarb, the active ingredient of fungicide Previcur® N, detection.....	114
4.2.3.3 Foliar chlorophyll, protein and phenolics concentrations	115
4.3 Statistical analysis	117
4.4 Results	117
4.4.1 Ectomycorrhizal (EM) colonisation	117
4.4.2 Arbuscular mycorrhizal (AM) colonisation	123
4.4.3 Endophytic fungi	128
4.4.4 Foliar feeding behaviour of larvae <i>Helicoverpa armigera</i>	128
4.4.5 Biochemical analysis	137
4.4.5.1 ITS sequences.....	137
4.4.5.2 Propamocarb.....	137
4.4.5.3 Foliar chlorophyll, phenolics and protein concentrations	137
4.5 Discussion	140
4.5.1 Do the EM inoculation and the systemic fungicide treatment affect the symbiotic fungal associations on <i>Populus nigra</i> clones?	140
4.6 Conclusions	146
4.7 Acknowledgement.....	147

4.8 References	148
----------------------	-----

Chapter 5.....158

5.1 Introduction	158
5.2 Materials and Methods	162
5.2.1 Details of the experimental lay-out are described in Chapter 2	162
5.2.2. Plant materials	162
5.2.3 Plant volatile collection	162
5.2.4 Identification of compounds.....	164
5.2.5 Data analysis	164
5.3 Results	165
5.3.1 Total number of identified VOCs.....	165
5.3.2 Comparison of single released VOC with treatments	169
5.4 Discussion and conclusions.....	174
5.5 Acknowledgement.....	176
5.6 References	177
