Acknowledgements

I am indebted to my supervisor Stephan Klasen, Ph.D. for his continuous support and advice. Without his guidance the many projects, surveys, and empirical analyses which are at the heart of this dissertation would not have been possible. For their helpful comments in completing this research I would also like to thank the other members of my Ph.D. Examination Board, J-Prof. Jann Lay and Prof. Lukas Menkhoff. I am also very grateful to many colleagues and friends in Thailand, Vietnam and especially in Yemen, whose commitment to our joint field work was a real inspiration, and who gave me many valuable insights into some of the most fascinating and complex societies on this planet. My special thanks also go to numerous colleagues at the University of Göttingen for their advice, practical help and friendship. In particular I would like to thank the many dedicated research assistants whose input was vital for the success of several projects I worked on during the past years. Lastly, I would like to thank my family and close friends for their invaluable support, inspiration, and laughs during the work on these chapters. Thank you so much!
