

**Molecular phylogeny of Southeast-Asian Dipterocarps
belonging to tribe Dipterocarpeae (family Dipterocarpaceae)
based on non-coding sequence data of
chloroplast and nuclear DNA**

Dissertation

submitted in partial fulfilment of the requirements for the degree of
Doctor of Philosophy (PhD.)

at the Department of Forest Genetics and Forest Tree Breeding,
Büsgen Institute, Faculty of Forest Sciences and Forest Ecology,
Georg-August University of Göttingen

By Nguyen, Phi Nga
born in Quang Nam, Vietnam

Göttingen, 2009

Bibliographic information published by the Deutsche Nationalbibliothek

The Deutsche Nationalbibliothek lists this publication in the Deutsche Nationalbibliografie; detailed bibliographic data are available in the Internet at <http://dnb.d-nb.de>.

Referee: Prof. Dr. Reiner Finkeldey

Co-referee: Prof. Dr. Ralph Mitlöhner

Date of disputation: 14 May 2009

Printed with the generous support from DAAD
(Deutscher Akademischer Austausch Dienst)

Nguyen, Phi Nga:

Molecular phylogeny of Southeast-Asian Dipterocarps belonging to tribe Dipterocarpeae (family Dipterocarpaceae) based on non-coding sequence data of chloroplast and nuclear DNA

Table of contents

I. Introduction.....	1
I.1 The family Dipterocarpaceae	1
I.2. Subfamily Dipterocarpoideae	3
I.3 Tribe Dipterocarpeae	8
I.3.1 Genus <i>Anisoptera</i> Korth.	9
I.3.2 Genus <i>Cotylelobium</i> Pierre.	10
I.3.3 Genus <i>Dipterocarpus</i> Gaertn.f.	10
I.3.4 Genus <i>Stemonoporus</i> Thw.	11
I.3.5 Genus <i>Vatica</i> Linn.	11
I.3.6 Genus <i>Upuna</i> Sym.	12
I.3.7 Genus <i>Vateria</i> Linn.	12
I.3.8 Genus <i>Vateriopsis</i> Heim.	12
I.4 Phylogenetic analyses in Dipterocarpaceae	14
I.5 Chloroplast and nuclear DNA variation and their applications to phylogenetics.....	16
I.6 Objectives	18
II. Materials and methods	19
II.1 Materials	19
II.2 Methods	21
II.2.1 Taxa identification.....	21
II.2.2 Laboratory methods.....	21
II.2.2.1 DNA extraction.....	21
II.2.2.2 Polymerase Chain Reaction (PCR).....	21
II.2.2.3 DNA sequencing.....	24
II.2.2.4 DNA cloning.....	24
II.2.3 Data analysis and statistical methods	24
II.2.3.1 Multiple alignment	24
II.2.3.2 Phylogenetic analyses.....	25
III. Results.....	26
III.1. Phylogenetic analyses of chloroplast regions.....	26
III.1.1 Sequence characteristics of <i>trnL</i> intron, <i>trnL-trnF</i> IGS and <i>petD</i>	26
III.1.2 Phylogenetic analysis	29

III.1.2.1 Neighbor-joining trees.....	31
III.1.2.2 Maximum parsimony trees.....	34
III.2. Phylogenetic analyses of nrITS regions.....	37
III.2.1 Sequence characteristics.....	37
III.2.2 Phylogenetic analysis	38
III.2.2.1 Neighbor-joining tree	40
III.2.2.2 Maximum parsimony tree	42
IV. Discussion	44
IV.1 Phylogenetic utility of DNA sequences in Dipterocarpaceae.....	44
IV.2 Choice of outgroup.....	45
IV.3 Phylogenetic inferences	47
IV.4 Incongruence between chloroplast- based and nuclear-based analyses.....	51
IV.5 Infrageneric relationships within genus <i>Anisoptera</i>	53
IV.6 Infrageneric relationships within genus <i>Vatica</i>	53
IV.7 Infrageneric relationships within genus <i>Dipterocarpus</i>	56
IV.8 Molecular differentiation between <i>Dipterocarpus</i> cf. <i>condorensis</i> Pierre and <i>Dipterocarpus caudatus</i> Foxw.	60
IV.9 Perspectives.....	61
V. Summary	64
VI. Zusammenfassung	68
VII. REFERENCES.....	72
VIII. Appendices.....	87
APPENDIX 1. Aligned sequences of trnL intron	88
APPENDIX 2. Aligned sequences of trnL-trnF intergenic spacer.....	94
APPENDIX 3. Aligned sequences of petD region.....	98
APPENDIX 4. Aligned sequences of ITS region (including the ITS1 and ITS2).	108
APPENDIX 5. Photos of some dipterocarp species in Vietnam.....	119
APPENDIX 6 1. Aligned sequences of ITS1 region of three <i>Dipterocarpus</i> species.....	139
APPENDIX 6 2. Aligned sequences of ITS2 region of three <i>Dipterocarpus</i> species.....	139
APPENDIX 7 Aligned sequences of <i>petD</i> , <i>trnL</i> intron and <i>trnL-trnF</i> IGS regions of three <i>Dipterocarpus</i> species.	140
